# BIO-MEDICAL WASTE MANAGEMENT POLICY

## 1. Definition of Bio-Medical Waste:

Bio-Medical waste (BMW) means any waste which is generated during the diagnosis, treatment or immunization of human beings or animals or research activities pertaining to or in the production or testing of biological samples (any preparation made from organisms or microorganisms or a product of metabolism and biochemical reactions). Bio-Medical Waste Management Rules are applicable to all persons who generate, collect, receive, store, transport, treat, dispose or handle BMW in any form.

## 2. Sources of Bio-Medical Waste:

Bio-Medical waste may be generated in laboratories of different Departments like Biotechnology, Zoology and Physiotherapy. Waste generated can be in the form of hypodermic needles, scalpel blades, lancets, gloves, cotton swabs, body fluids, blood etc. It is important to realize that if BMW is mixed together with other waste, then the whole waste becomes harmful. The key to minimize and effectively manage bio-medical waste is the identification of waste and its segregation. The most appropriate way to do so is by sorting the waste based on colour. BMW has been classified into 4 categories i.e. Yellow, Red, White and Blue.

### Colour Coding and Type Of Container for Disposal of Bio-Medical Wastes

Colour Coding	Type of Bag	Type of waste	Treatment/ Disposal options
Yellow	Non Chlorinated plastic bags of yellow colour and of 50 micron	<ul style="list-style-type: none"><li>• Microbiology, Biotechnology and other clinical laboratory waste (Blood bags, Laboratory cultures, stocks or specimens of micro - organisms, live or attenuated vaccines, human and animal cell cultures used in research, industrial laboratories, production of biological, residual toxins, dishes and devices used for cultures)</li><li>• Chemical Liquid Waste (waste generated due to use of chemicals in production of biological samples, discarded infected secretions, aspirated body fluids, liquid from laboratories etc.)</li><li>• Soiled Waste (Items contaminated with blood, body fluids like dressings, cotton swabs and bags containing residual or discarded blood and blood components)</li><li>• Human and animal anatomical waste</li></ul>	Autoclaving/ disinfection by chemical treatment and discharge

## BIO-MEDICAL WASTE MANAGEMENT POLICY

Red	Non chlorinated plastic bag of red colour and of 50 micron (after cutting /mutilation)	Contaminated Plastic waste generated from disposable items such as tubing, bottles, syringes (without needles and fixed needle syringes ) and vaccutainers with their needles cut) and gloves.	Autoclaving/ Chemical Treatment
White	Translucent, Puncture proof, Leak proof, tamper proof containers	Waste sharps including metals, Needles, syringes with fixed needles, needles from needle tip cutter or burner, scalpels, blades, or any other contaminated sharp object that may cause puncture and cuts. This includes both used, discarded and contaminated metal sharps	Disinfection/ chemical treatment/ autoclaving/ destruction
Blue	Cardboard box with blue coloured marking	Glass waste such as broken glass, contaminated glass	Disinfection (by soaking the washed glass waste after cleaning with detergent and Sodium Hypochlorite treatment) or Autoclaving

### 3. Bio-Medical Waste Management at SGGSWU:

It is well known and documented that BMW is a potential health hazard to laboratory workers, public as well as flora and fauna of the area. Considering the inappropriate BMW management, the Ministry of Environment and Forests implemented certain rules. In accordance with these rules, it shall be the duty of an institution generating bio-medical waste (which includes pathological laboratory) to take all steps to ensure that such waste is handled without any adverse effect to human health and the environment.

Thus, the main objectives of bio-medical waste management are:

- i) To prevent transmission of diseases from patient sample to the laboratory workers.
- ii) To prevent injury to laboratory worker while handling bio-medical waste.
- iii) To prevent general exposure to harmful effects of toxic bio-medical waste.

Following steps have been taken up by the University to manage the Bio-medical waste:

- i) The Segregation, Packaging, Transportation and Storage shall be done.
- ii) Bio-medical waste shall not be mixed with other wastes.

SRI GURU GRANTH SAHIB WORLD UNIVERSITY, FATEHGARH SAHIB

*Rupinder Kan*

Head  
Department of Biotechnology  
SGGSWU, Fatehgarh Sahib

## BIO-MEDICAL WASTE MANAGEMENT POLICY

- iii) Bio-medical waste shall be segregated into containers/bags and labelled at the points of generation in accordance with Schedule-I prior to its storage transportation, treatment and disposal.
- iv) No untreated bio-medical waste shall be kept stored beyond a period of 48 hours.
- v) The University normally does not generate hazardous waste. However, in the Biotechnology department labs, sterilization is performed by autoclaving and then the remaining wastes are properly disposed of, in accordance with standard waste disposal norms.

Safe and effective management of bio-medical waste is not only a legal necessity but also a social responsibility. As per Bio-Medical Waste Management Rules, 2016, no hospital/laboratory can establish on site treatment and disposal facility, if a service of common bio-medical treatment facility is available within a distance of 75 kilometer. Thus, BMW at Sri Guru Granth Sahib World University (SGGSWU), Fatehgarh Sahib is outsourced to M/s Rainbow Environments Pvt Ltd. through a 3-year contract i.e. 20.11.2023 to 19.11.2026 (refer annexure I). Rainbow Environments Pvt Ltd. has setup a facility to collect, transport, treat and dispose off the BMW generated by the health care establishments. It shall collect the BMW from the SGGSWU premises. As per the agreement, Rainbow Environments Pvt Ltd. is liable to meet the rules and regulations stipulated by the Punjab Pollution Control Board (PPCB). Also, liability of violating the Environment (Protection) Act 1986 and the relevant rules made there under shall rest on Rainbow Environments Pvt Ltd. Rainbow Environments Pvt Ltd has been collecting the BMW of SGGSWU since 2013.
